SUMMARY

Software Engineer with over three years of development experience. Currently designing and building user-centric web applications by translating complex technical systems into intuitive, high-impact interfaces using Next.js, Tailwind CSS, Shadcn, and GSAP. Experienced in aligning frontend development with brand communication, social strategy, and technical storytelling, with a proven ability to craft engaging digital experiences and developer-focused content. Comfortable driving design-led development, backend and full-stack development, managing content cadence, and collaborating across distributed asynchronous remote teams.

EDUCATION

TRINITY COLLEGE DUBLIN — OCT 2023

Bachelor of Engineering, Computer Engineering - First Class Honours/1:1

SKILLS

Languages: TypeScript, JavaScript, HTML5, CSS, Python, SQL

Others: Three.js, Shadcn, Tailwind CSS, GSAP, Next.js (App Router), Git, Docker, REST APIs, Front-end Development, Front-end design, Full-stack development, Responsive Design, Mobile-First Design.

EXPERIENCE

MOTILAL OSWAL FINANCIAL SERVICES LTD. — JUN 2025 - NOW CONTENT & BRAND STRATEGIST

- Analysed and presented engagement, CTR, user journey and campaign data, informing content strategy. Produced structured reports and narrative summaries to communicate outcomes to business stakeholders.
- Developed user journeys to enhance app awareness and increase retention by employing industry-leading UX.

FREELANCING — SEP 2024 - NOW FRONT-END DEVELOPER

- Currently redesigning the front-end for an e-commerce website using *TypeScript* with a *Laravel (PHP)* backend.
- Building responsive and immersive UI with *Three.js*, *Shadcn*, *Tailwind CSS*, and *GreenSock Animation Platform*.

FULL-STACK DEVELOPER

- Designed and developed a full-stack *Next.js (React)* promotional website for a hardware manufacturing firm using *TypeScript* with a *Node.js* backend for contact forms. Currently providing hosting management.

PYTHON DEVELOPER

- Developed a *Python*-based *Windows* standalone application to automate consolidation of financial data with over \$10M in yearly transactions, utilising *Pandas* for data manipulation and *Tkinter* for GUI development.
- Reduced processing time to consolidate *Excel* tabular data from 5 days to ~17 minutes, generating 11 reports to save auditors hours in analysing and providing valuable insights as quickly as possible.

AVAYA LLC — MAY 2023 - JUL 2024 JUNIOR CLOUD ENGINEER

- Maintained a multi-tenanted *Kubernetes*-based web application with 16 *Docker* containerised *Go* and *Java* micro-services integrated with *Kafka*, deployed on *Azure Cloud*, requiring 99.9% uptime across multiple regions.
- Spearheaded backend development for two new features in the application, coordinating between product owners, front-end, and QA to ship features earlier than expected for the customer.

MOUNT TECHNICS CONSULTANCY — MAY 2022 - AUG 2022 SOFTWARE DEVELOPER

- Engineered an automated data pipeline using *Python* and *Selenium* to scrape multiple sites, clean and compile data into an *SQL* database for sentiment analysis in ~2 minutes, removing manual intervention by 95%.

PROJECTS AND CERTIFICATIONS

- **AI Traffic Control System** - PyTorch, Deep Learning, AI Pipelines for Python integrated decision driving.
- **FreeCodeCamp Machine Learning Certificate** - Python, TensorFlow, PyTorch, Keras, NLP, Neural Nets.
- **Automate the Boring Stuff Certificate** - Selenium, BeautifulSoup, Excel Automations, Regex, Web Scraping.
- **Formula Trinity** - Git, Linux, Deep Reinforcement Learning, OpenCV, PyTorch.
- **Google Data Analytics Certificate** - SQL, R, Tableau, Statistical Analysis, Data Analysis and Visualisation.
