SUMMARY

Polymath with excellent system management skills and a need to be organized. Works with a top-down approach, understands the bigger picture first and then get into details as you move along. Professional Experience includes developing software for small, large, and multi-national enterprises, freelancing, open source development, and marketing content creation and performance analysis. Self-driven, prefers autonomy in work, and delivers quality output. Excellent managerial and organizational skills developed by collaborating and coordinating in remote asynchronous environments. Avid reader and blogger in the space of tech, philosophy, and psychology. Looking for opportunities close to the Founder/CEO/Upper Executive offices.

SKILLS

Software: Microsoft Office, Google Workspace, ChatGPT, Claude, Social Platforms, Slack, Zoom, Discord

Engineering: Python, TypeScript, Next.js, SQL, Docker, GitHub, SEO & Full-Stack Development

Ramps up easily to new tasks, accustomed to remote environments and asynchronous communication, previously collaborated in large teams and leading small teams to success. Likes developing agentic workflows and software automations to make everyday life easier.

EXPERIENCE

AI & Marketing | Brownsmith Dynamics

Sep 2024 – Present

- Entrepreneurial and freelancing experience developing software, automations, and websites.
- Developing an SEO and social media strategy for online visibility via organic and agentic searches.
- Promoting use of open-source software in the age of AI to ensure new applications can rely on existing proven technologies instead of shipping untested LLM-coded software.
- Publishing reusable Agent Skills to promote smarter and deterministic agents for everyone.
- Learning to balance outreach, client meetings, work, developing repeatable workflows and automations.

Content & Branding | Motilal Oswal Financial Services

Jun 2025 – May 2026

- Large corporate experience developing marketing strategies and running data analysis.
- Tracked user journeys to design better User Interface and Experience for website and application flows.
- Managed and organized content production, delivery, and performance analysis.
- Learned to write content, streamline workflows for content creation and delivery, and present key insights to stakeholders about the online market visibility of the brand.

Cloud Engineer | Avaya LLC

May 2023 – Jul 2024

- Multi-national corporate experience developing a high-availability communication SaaS.
- Worked completely remotely as a backend engineer handling asynchronous communication.
- Led development of two features across four teams based in four different locations.
- Owned development of client-side auth after discovering a vulnerability due to using deprecated libraries.
- Collaborated with the team for bug fixing, performance testing, and routine development and maintenance.
- Learned to deliver software following good practices and avoiding technical debt, and to prioritize tasks for streamlining meetings, development, and personal and team goals.

Python Developer | Mount Technics Consultancy

May 2022 – Aug 2022

- Small enterprise experience developing a web automation pipeline for collecting data for machine learning.
- Owned the entire pipeline for searching, scraping, and storing data for a production-ready use case.
- Worked independently to learn and develop the pipeline while collaborating weekly with a manager.
- Learned to break problems into smaller tasks and move systematically towards completion.

EDUCATION

Trinity College Dublin | Bachelor of Engineering, Computer Engineering, First Class Honours (1:1) | 2023

BITS Pilani WILP | Master of Business Administration, AI in Business (Part Time) | Expected 2028
